### **Big Brother 'Bug' Tickles Pravda**

MOSCOW, Dec. 13 (UPI) — "Big Brother" works in the United States, the Communist Party newspaper Pravda said today.

Commenting on the current wiretap controversy in the United States, Pravda said, "Now who is Big Brother? . . . and where does Big Brother dwell?"

The paper chuckled that "some top policy makers in Washington . . . personally listened to taped conversations and then complained that they couldn't make out very well what was being said. Of late . . . better equipment has begun to be used."
